MDCCXCVI.

ADVERTISEMENT.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds

of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them ; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.

CONTENTS.

- I. *THE Croonian Lecture on Muscular Motion.* By Everard Home, Esq. F. R. S. page 1
- II. *Some Particulars in the Anatomy of a Whale.* By Mr. John Abernethy. Communicated by Everard Home, Esq. F. R. S. p. 27
- III. *An Account of the late Discovery of Native Gold in Ireland.* In a Letter from John Lloyd, Esq. F. R. S. to Sir Joseph Banks, Bart. K. B. P. R. S. p. 34
- IV. *A mineralogical Account of the Native Gold lately discovered in Ireland.* In a Letter from Abraham Mills, Esq. to Sir Joseph Banks, Bart. K. B. P. R. S. p. 38
- V. *The Construction and Analysis of geometrical Propositions, determining the Positions assumed by homogeneous Bodies which float freely, and at rest, on a Fluid's Surface; also determining the Stability of Ships, and of other floating Bodies.* By George Atwood, Esq. F. R. S. p. 46
- VI. *Account of the Discovery of a new Comet.* By Miss Caroline Herschel. In a Letter to Sir Joseph Banks, Bart. K. B. P. R. S. p 131
- VII. *Mr. Jones's Computation of the Hyperbolic Logarithm of 10 improved: being a Transformation of the Series which he used in that Computation to others which converge by the Powers of 80. To which is added a Postscript, containing an*

- Improvement of Mr. Emerson's Computation of the same Logarithm. By the Rev. John Hellins, Vicar of Potter's Pury, in Northamptonshire. Communicated by the Rev. Nevil Maskelyne, D.D. F. R. S. and Astronomer Royal.* p. 135
- VIII. *Manière élémentaire d'obtenir les Suites par lesquelles s'expriment les Quantités exponentielles et les Fonctions trigonométriques des Arcs circulaires. Par M. Simon L'Huilier, F. R. S.* p. 142
- IX. *On the Method of observing the Changes that happen to the fixed Stars ; with some Remarks on the Stability of the Light of our Sun. To which is added, a Catalogue of comparative Brightness, for ascertaining the Permanency of the Lustre of Stars. By William Herschel, LL. D. F. R. S.* p. 166
- X. *Experiments and Observations on the Inflection, Reflection, and Colours of Light. By Henry Brougham Jun. Esq. Communicated by Sir Charles Blagden, Knt. Sec. R. S.* p. 227

APPENDIX.

Meteorological Journal kept at the Apartments of the Royal Society by Order of the President and Council.

THE PRESIDENT and COUNCIL of the ROYAL SOCIETY adjudged, for the year 1795, the Medal on Sir GODFREY COPLEY's Donation, to Mr. JESSE RAMSDEN, F. R. S. for his various inventions and improvements in the construction of the instruments for the trigonometrical measurements, carried on by the late Major General ROY, and by Lieutenant Colonel WILLIAMS and his Associates.
